

What is claimed is:

1. A support system using a data carrier system comprising:
at least one tag being a data carrier that is disposed at
a predetermined position; and

at least one reader/writer that communicates with said tag;
said tag being provided with an input/output means, a
predetermined device being connected to said input/output means,
and said predetermined device being operated by information output
from said reader/writer.

2. A support system using a data carrier system as claimed
in claim 1 wherein:

 said tag is started up in response to supply of
 electromagnetic wave from the outside.

3. A support system using a data carrier system as claimed
in claim 1 wherein:

 a plurality of said tags is disposed in a living environment
 of human being; and

 said predetermined device is a device for detecting a
 presence of human beings.

4. A support system using a data carrier system as claimed
in claim 2 wherein:

 a plurality of said tags is disposed in a living environment
 of human being; and

 said predetermined device is a device for detecting a

presence of human beings.
